Exporting Content from iPod

Step 1: Pre select any /all content you wish to transfer

Step 2: use a USB cable to connect the iPod to a computer to upload videos

Once you plug in the iPod or device, a window with pop up. This is where you will see the option to import to your computer.

Step 3: MAKE SURE to save videos to your own personal computer or upload them to a private space (i.e. your personal google drive)

We recommend uploading to your MSU google drive once you are on the MSU or your HOME WIFI network only.

Step 4: make sure to make a copy of these videos for editing purposes so you do not accidentally delete any footage you may need

NOTE do not upload to any shared devices or use Wi-Fi throughout this process: these videos must stay confidential
