# Installing the AnyConnect client for Mac OS X

For installation on non-University provided (personally owned) computers, download it directly from the following links:

Mac OS X

Download the disk image from the link above and double-click to open it. Double-click the "vpn.pkg" file to run it. Follow the dialog boxes to install the software, clicking Continue, Agree, or Install on each screen to proceed.
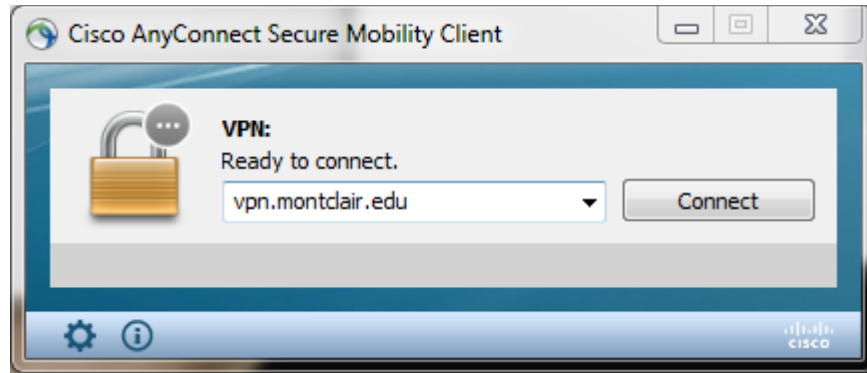

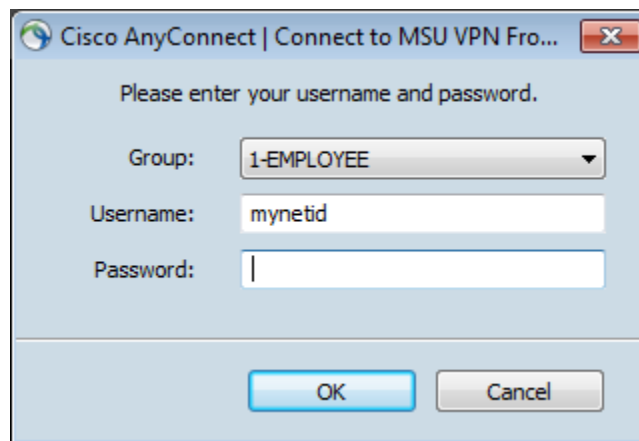

Using the AnyConnect Client

(Note: These screenshots are from the Windows version but the macOS version is very similar.)

Enter **vpn.montclair.edu** in the dialog box and click Connect

When prompted, select the Employee profile "1-EMPLOYEE".

In the fields labeled *Username* and *Password*, enter your MSU NetID and password.

In the field labeled *Second Password* you can type one of the following words:

push   Duo will send a push notification to your phone with Duo Mobile installed
sms   Duo will send an SMS to your registered cell phone
phone Duo will call your registered cell phone

Alternatively, you can enter the token generated by Duo Mobile in the field labeled *Second Password*. To reveal this token, open Duo Mobile and tap **Montclair State University**.
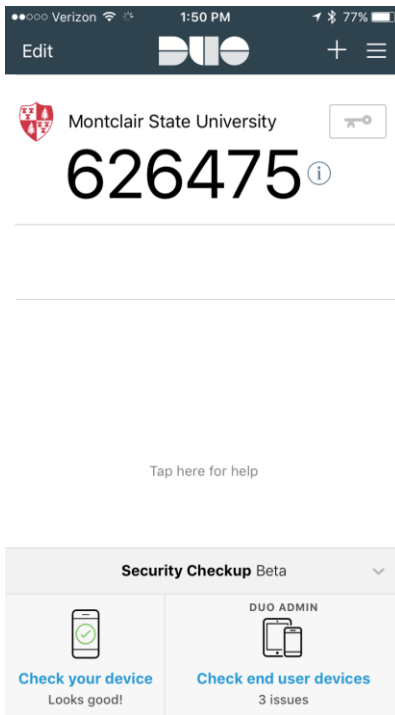

After you connect for the first time, the Cisco AnyConnect client will present an option dropdown box for "Connect to MSU from Off Campus".

After connecting the first time, when you go to reconnect to the VPN, simply select this option from the drop-down box and click Connect.
