Persistent Systems

**Title:** Technical Writer

**Location:** New York, NY

**Job Type:** Full-Time (Experienced)

**Compensation Type:** Salary

**Start Date:** ASAP

**Job Description:** Persistent Systems is looking for a Technical Writer with experience creating, editing, and maintaining technical documentation. This individual will be responsible for all technical documentation for end users of Persistent System’s industry-leading Wave Relay® products.

**Primary Responsibilities:**

- Creating user-level technical procedures and technical manuals by determining the needs of end users
- Creating, editing, formatting White papers for promotional use
- Reviewing existing documentation, executing procedures listed, determining gaps, and creating technical documentation that minimizes the probability of user error
- Working with engineers and product designers to create technical documentation based on their descriptions
- Creating, editing, formatting, and maintaining technical images for use in documentation

**MINIMUM QUALIFICATIONS**

- Associate’s degree in a technical field
- At least 2 years of experience creating, editing, and maintaining technical documentation for end users
- Must have a United States security clearance or be able to obtain United States security clearance

**PREFERRED QUALIFICATIONS**

- Bachelor’s degree in Electrical Engineering, Computer Science, Computer Engineering or related
- High proficiency with Microsoft Word
- Experience with technical editing and formatting complex documents
- Experience with AutoCAD, Autodesk Inventor, Visio, InDesign, and Solidworks
- Experience with graphic design
- Experience building and maintaining a documentation library/repository
- Experience working in a product development and marketing organization

Disclaimer Information

About the organization: Persistent Systems is a growing business that develops Mobile Ad hoc Networking (MANET) wireless radio systems for US Government and commercial applications. The radios are typically worn on the person, mounted to manned vehicles, integrated into autonomous unmanned vehicles, or installed at fixed sites. The systems provide on-the-move data, voice, video, and situational awareness capability. Located in the heart of New York City, Persistent Systems is an exciting company that is passionate about delivering cutting edge products.
