SEARCH Consulting

Title: Instructor/Data Analyst for Learners with Autism

Location: Mountainside, NJ

Job Type: Full-Time

Compensation Type: Salary

Start Date: ASAP

BACKGROUND: Instructors provide direct instruction to young learners with autism using the science of applied behavior analysis (ABA), as well as programming and curriculum design under BCBA oversight.

RESPONSIBILITIES: The following responsibilities will be completed under the supervision of the assigned learners’ Team Leader(s), as well SEARCH's Clinical and Executive Directors.

Clinical Instruction

• Provide in-session instruction to assigned learners
• Demonstrate competence and knowledge in all implemented programs
• Collect data on skill acquisition and behavior reduction programs using outlined measurement procedures
• Undergo direct supervision weekly (at minimum)

Data Analysis

• Create and maintain individualized student curricula
• Maintain skill acquisition and behavior reduction programming
• Write individualized skill acquisition programs (e.g., teaching procedures, response definitions)
• Design instructional units, teaching procedures, data collection systems with BCBA oversight (including generating ideas for programming)
• Report mastered and stagnant programs to Team Leader via written lists
• Maintain assigned learner’s data notebook
• Generate assigned learner’s progress report quarterly

Parent Involvement

• Conduct in-session instruction during parent observations
• Conduct parent training sessions at SEARCH (e.g. identify goals, teaching procedures, data collection systems)
• Conduct home programming parent training sessions

Home visits will take place after 2:30 p.m. minimally two hours per month

COMPENSATION PACKAGE:

• Salaried position (commensurate with experience)
• Benefits and retirement packages available (including paid time off)
• Monday-Friday 8:00 a.m. - 3:30 p.m.
• Supervision provided 3-5 hours per week by BCBA (on-site at all times), including to BCBA, BCaBA, and RBT candidates

REQUIREMENTS:
All Instructors are required to possess a minimum of a Bachelor’s degree.
Candidates who are currently certified as BCaBA or RBT as recognized by the Behavior Analyst Certification Board(®), and/or pursuing a credential of BCBA, BCaBA, or RBT as recognized by the BACB® are preferred, but not required for consideration.

Application Instructions: Please submit cover letter and resume to: ronufer@searchaba.com

About the organization: SEARCH Consulting provides 1:1 applied behavior analytic (ABA) programming to young children with a diagnosis of autism. Our center-based program is located in Mountainside, New Jersey and provides an ideal setting for our comprehensive educational model. Three classrooms, indoor and outdoor play spaces, as well as areas for small group instruction provide staff and students a facility where we can work together to create meaningful and lasting changes. SEARCH’s educational programming targets all areas of skill development while focusing specifically on the core deficits of autism – language, communication, and social skill development. Ongoing parent training, home programming visits, and weekly supervision by BCBA’s allow SEARCH learners to reach their maximum potential.
