1515 Broad Street
Exit and Evacuation Plans

When a fire alarm sounds:
- Leave the building and proceed to your staging area.
- Use the stairwells, not the elevator.
- Remain outside until a firefighter or police officer tells you that you may reenter the building.

Always know two ways out!
To help emergency responders handle an emergency situation, please ensure that the street in front of and leading to the building are clear of all Montclair State University students, staff, and faculty.
