Canvas: Student View

Student View allows instructors to see the course as a student views it. Student View creates a "Test Student" user. As the “Test Student”, you can submit Assignments, post to Discussions, and see the course as a student.

1) Click Settings from the course navigation
2) Click Student View

Note the bar on the bottom of the screen which indicates that you are logged into Student View.

3) To exit student view, click Leave Student View
Reset Test Student
You can Reset the Test Student to clear the Test Student's history and re-check content in the course. For example, if an instructor created an assignment and submitted it as the Test Student but then forgot to add a certain submission type, the instructor can click the **Reset Student** button and submit the assignment again as the Test Student.

1) Click **Reset Student**
2) Click **Leave Student View** when done
