Changing Your Incoming and Outgoing Passwords in K-9

1) Load K-9
2) On the top right (or bottom), press on the 3 dots and select Account Settings, and then Settings

From here you can go to Fetching Mail to change your incoming mail password and Sending Mail to change your outgoing mail password. You will need to change both passwords if you changed your MSU NetID password. Both the Fetching and Sending mail passwords need to be the same password you set as your new MSU NetID password.

Change Your Incoming Mail Password:

1) Press Fetching Mail
2) Press Incoming Server
3) Change your password in the Password area, then press Next on the bottom right.
Change Your Outcoming Mail Password:

1) Press Sending Mail
2) Press Outgoing Server
3) Change your password in the Password area, then press Next on the bottom right.
Change Your Password for Google Calendar:

You will be prompted to enter your NetID Username and Password when you open Google Calendar. You must complete the steps above in order to be prompted to enter your new NetID password.
