Guidelines for Documentation of a Mobility, Sensory, or Chronic Medical Disability

Each student requesting accommodations through the Disability Resource Center is required to submit documentation to verify eligibility under Section 504 of the Rehabilitation Act of 1973 and the Americans with Disabilities Act (ADA). As defined by Section 504 and the ADA, an individual with a disability is a person who has a physical or mental impairment which substantially limits a major life activity, including learning. Academic adjustments and other accommodations are implemented to provide equal access to college programs and services.

In order to establish eligibility as an individual with a disability, the student must submit documentation that is comprehensive and clearly specifies the presence of a disability, and is appropriate to the post-secondary setting.

Any specific recommendations for accommodations must be based on significant functional limitations and must be supported by the diagnostic assessment. Accommodations and academic adjustments cannot be implemented until the student's documentation meets these criteria. Prior history of having received an accommodation does not, in and of itself, warrant or guarantee its continued provision. An Individualized Education Plan (IEP) is not sufficient documentation of a disability.

Documentation of a mobility, sensory, or chronic medical disability must be provided by a doctor or other medical professional with training and expertise related to the particular medical condition identified. The diagnostic report must be submitted on official letterhead with name(s), title(s), professional credentials, address, and telephone number of the person providing the documentation. All reports must be signed and dated.

Documentation must include the following information:

1. **Diagnosis** – A current medical diagnosis including appropriate medical reports, relevant medical history, and a clinical summary.

2. **Current Treatment** – Identification of treatment, medications, assistive devices, or other services currently prescribed or in use.

3. **Evaluation of Impact** – Identification of the substantial limitation on a major life activity presented by the disability, and a description of the current functional impact of the disability in a college setting. The assessment should validate the need for services based on the impact of the student’s disability and level of functioning in an educational setting.

4. **Specific Recommendations** – Suggested accommodations and/or academic adjustments, with an explanation supporting the need for each accommodation to achieve equal access.
