Art and Design
ARGS 260 01 Visual Art Workshop: Cultural Study of Metalwork and Jewelry
Students will examine and analyze jewelry and metalwork in terms of aesthetics and socio-cultural influences across time and space. The focus of this class will be on Ancient through Iron Age cultures, many of which are non-western. Students will explore the aesthetics, properties, materials, and technology of early jewelers and artisans, as well as the socio-political environments they thrived in. Students will review literature and images that reflect or encompass current knowledge of various cultures’ jewelry, metalwork, and adornment, and explore the shortcomings and expansion of said knowledge.

Biology and Molecular Biology
BIOL 489 01 Selected Topics in Organismal Biology: Principles of Physiology
Principles of Physiology provides an overview of the major human physiological systems touching on their role and interactions with other systems during homeostasis and with patho-physiological states such as obesity and exercise.

Counseling and Educational Leadership
ELAD 670 01 Selected Topics in Administration and Supervision: Administration and Supervision of Special Education
For details, please contact the department at 973-655-7216.

ELAD 670 02 Selected Topics in Administration and Supervision: Administration and Supervision in School Safety and Security
This course will be designed to provide students pursuing their master’s degree in educational leadership exposure to the most important work in our time; keeping students safe. The course will include content which supports N.J.A.C.6A:16-5.1 School safety and security plans which state each school district shall develop and implement comprehensive plans, procedures and mechanisms that provide for safety and security in the public elementary and secondary schools of the school districts. Course content will expose students to standards to evaluate their schools security plans, then develop practical and systematic plans for ensuring an orderly and caring learning environment. The course also addresses several theoretical perspectives through which students will come to understand the importance of school safety. Attention is given to the distinction between preventing violence and promoting safety.

Health and Nutrition Science
HLTH 347 91 Health Issues Forum: The Experience of the Arts in Health Care
The purpose of this course is to provide students with an understanding of the many roles the arts can play in healthcare settings, and how this topic establishes an important, interdisciplinary focus both academically and professionally. Students will attend a healthcare delivery site (e.g., hospital) where they can gain hands-on experience observing and participating in arts-based, service-oriented experiences, reflected in readings and other materials provided within the course. Students would be challenged to
reflect critically upon their experiences, and to integrate these reflections relevantly into their own area(s) of study.

HLTH 577 91 Selected Topics in Health: *The Experience of Arts in Healthcare*
The purpose of this course is to provide students with an understanding of the many roles the arts can play in healthcare settings, and how this topic establishes an important, interdisciplinary focus both academically and professionally. Students will attend a healthcare delivery site (e.g., hospital) where they can gain hands-on experience observing and participating in arts-based, service-oriented experiences, reflected in readings and other materials provided within the course. Students would be challenged to reflect critically upon their experiences, and to integrate these reflections relevantly into their own area(s) of study.

**Psychology**
PSYC 659 01 Special Topics Seminar in Psychology: *Ethics in Psychology*
This course will provide a comprehensive overview of core ethical and professional issues pertaining to psychology-related activities in practice, teaching, and research settings. Through readings, discussions, and case analyses, this course aims to provide students familiarity with the Ethics Code of the American Psychological Association (APA) and skills for ethical decision-making and resolution of ethical dilemmas in psychology.

School of Communication and Media
TVDM 255 01 Special Topics in Television and Digital Media: *Media Effects: Politics, Sex and Stereotypes*
This course will explore the critical role media plays in shaping the attitudes and behaviors of individuals and society. Specifically, we will examine how mass media influences: 1) voter judgments and decision-making, 2) viewer perceptions of racial, ethnic, and broader social groups, and 3) personal sexual expectations, knowledge, and lifestyle. Throughout the course we will seek to explain why and how specific mediated messages are most effective at resonating with audiences, as well as the active role viewers play in contributing to these effects.
