The semester enrollment report is based on information taken from the University’s student information system at the time of the semester’s census date. These figures reflect how Montclair State University looks at the beginning of each semester, after students have dropped courses but before any withdrawals have occurred. Thus the numbers found in this report are the highest counts for the semester. Reports generated later in the semester will most likely reflect students who have withdrawn from courses and will be smaller than these official counts.
