

Montclair State University Institute and Center Logo Usage

Some institutes and centers, such as the Joseph and Elda Coccia Institute for the Italian Experience in America, or the George Segal Galley, may require a special logo. Institutes and center should not “brand” without being under the umbrella of the University, nor should they create their own logo. These two examples show how the logo treatment works with a relatively short name and a longer name.

If you need the logo with the name of your institute or center, please [contact us](#) and our Graphic Design Services department will supply artwork.
