

ENWR 105 Mid-Semester Evaluation

1. Have our large group discussions of the published authors' essays helped you better understand their style of writing and/or the strengths of their essays? Would you prefer to see more small group discussions of the published authors?
2. Have you found the assigned readings to be interesting and/or informative? In general, what kind of readings would you like to see more of, or less of?
3. Describe the experience of writing an essay through three drafts. Has it been helpful writing three drafts, rather than just one? Why or why not?
4. Have the peer critiques helped you to revise your second drafts into your third drafts? Why have or why haven't the peer critiques been effective?
5. Have my comments on your essays helped you better understand how to improve them? What kind of written comments would you like to see more, or less of?
6. Have our in-class brainstorming and source material exercises been helpful? Did they give you a strong understanding of how to begin and then develop your essays? What exercises would you like to see more, or less of?
7. Please make any additional comments that you feel may benefit the class.
