About Montclair State University

Since its founding in 1908, Montclair State University has had a rich history of innovation, distinction, and growth. Montclair State, a vital educational force, is ranked as one of the top universities in the region. Graduates from Montclair State University are well equipped with the skills needed to respond to today’s dynamic environment, as well as future challenges and opportunities.

About the College of Education and Human Services

With a more than 100-year tradition of excellence and educational leadership, the College of Education and Human Services offers several advantages for those pursuing their bachelor’s degree:

• Outstanding and innovative programs in the education and human services fields with nationally-recognized faculty and accreditation;
• Program faculty and staff dedicated to meeting the unique needs of our student population;
• Facilities that are on the cutting edge of learning and technology, including University Hall, the College’s home, and the largest and most sophisticated building in the University’s history.

Turn your passion for food and nutrition into an enriching career
Overview

With national rates of obesity and related illnesses at an all time high, and with outbreaks of food borne illnesses such as salmonella regularly making headlines, the general public has begun to realize just how important it is to eat well. Nutrition and food science focus on the chemical and biological components of food and the ways in which these ingredients affect our health.

The program’s mission is to provide students with a solid foundation in nutrition and food studies and to offer a supportive learning environment with enriching experiences and practical training that is responsive to student, professional, and community needs. It provides future leaders with the skills and knowledge they will need to devise and implement strategies and policies to prevent leading and emerging health threats and to reduce health and nutrition disparities.

Program

Montclair State University’s Department of Health and Nutrition Sciences offers a BS in Nutrition and Food Science with three different concentrations:

Dietetics Concentration
Dietitians work in a variety of settings (private practice, community clinics, hospitals) and provide clinical advice to individual patients on managing chronic conditions through diet.

Food Management Concentration
Food managers work in institutional food programs, catering, hospitality, and restaurants, and understand how to manage employees, purchase and prepare quantity foods, and market and sell food.

General Concentration
Nutrition scientists work for corporations and government agencies and may be involved in food safety or preservation, nutrition labeling, or laboratory research, and development.

Some of the courses available to students who choose to major in Nutrition and Food Science include:

- Food and Society
- Quantitative Food Purchasing
- Meal Design
- Experimental Food Science
- Nutrition Education
- Sports Nutrition
- Applied Nutrition in the Lifecycle

The Department of Health and Nutrition Sciences also offers an undergraduate minor in nutrition science, and a Master of Science in Nutrition and Food Science.
