MIKIE SHERRILL
GOVERNOR

April 27, 2026

Dear Friends,

On behalf of the State of New Jersey, it is my pleasure to welcome all those gathered for the inaugural class of Montclair State University's Clean Energy and Sustainability Analytics Center (CESAC) Utility Regulatory Training.

The CESAC Utility Regulatory Training (Rate School) offers a practical, immersive, and comprehensive ratemaking training program to equip utility practitioners and public sector professionals with a strong understanding of utility regulation and ratemaking principles. Through the intensive professional development offered through the Rate School's programming, participants will gain an understanding of the regulatory framework governing essential markets such as electricity, gas, and water utilities, while also mastering revenue requirements, rate design principles, and practical skills through mock rate case exercises.

As Governor, I am proud to recognize Montclair State University's Rate School and their efforts to bolster New Jersey's regulatory, analytical, and utility-sector workforce. I am confident that the residents of our State will benefit immensely from the impact of your work and your commitment to serving the public good.

Again, congratulations, and best wishes in this important new chapter.

Sincerely,

A handwritten signature in blue ink, reading "Mikie Sherrill".

Mikie Sherrill
Governor
