

[HERE](#) is a guide for more information on each point

Section 1194.22 Web-based Intranet and Internet information and Applications - Detail		
Voluntary Product Accessibility Template		
Criteria	Level of Support & Supporting Features	Remarks and explanations
(a) A text equivalent for every non-text element shall be provided (e.g., via "alt", "longdesc", or in element content).	Partially supported	Not consistent throughout the platform, generally available where keyboard navigation is enabled.
(b) Equivalent alternatives for any multimedia presentation shall be synchronized with the presentation.	Not Applicable	No additional info.
(c) Web pages shall be designed so that all information conveyed with color is also available without color, for example from context or markup.	Supported	Tables can be chosen or numbers behind visual information can be downloaded.
(d) Documents shall be organized so they are readable without requiring an associated style sheet.	Supported	All documents exportable from the platform are available as PDF.
(e) Redundant text links shall be provided for each active region of a server-side image map.	Not Applicable	No additional info.

<p>(f) Client-side image maps shall be provided instead of server-side image maps except where the regions cannot be defined with an available geometric shape.</p>	<p>Not Applicable</p>	<p>All pictures are generated client side.</p>
<p>(g) Row and column headers shall be identified for data tables.</p>	<p>Supported</p>	<p>No additional info.</p>
<p>(h) Markup shall be used to associate data cells and header cells for data tables that have two or more logical levels of row or column headers.</p>	<p>Partially supported</p>	<p>Construction of tables follow HTML guidelines in parts of the platform.</p>
<p>(i) Frames shall be titled with text that facilitates frame identification and navigation</p>	<p>Supported</p>	<p>No additional info.</p>
<p>(j) Pages shall be designed to avoid causing the screen to flicker with a frequency greater than 2 Hz and lower than 55 Hz.</p>	<p>Supported</p>	<p>No content is updating at a high frequency rate.</p>
<p>(k) A text-only page, with equivalent information or functionality, shall be provided to make a web site comply with the provisions of this part, when compliance cannot be accomplished in any other way. The content of the text-only page shall be updated whenever the primary page changes.</p>	<p>Not Supported</p>	<p>No additional info.</p>

<p>(l) When pages utilize scripting languages to display content, or to create interface elements, the information provided by the script shall be identified with functional text that can be read by Assistive Technology.</p>	<p>Not Applicable</p>	<p>No additional info.</p>
<p>(m) When a web page requires that an applet, plug-in or other application be present on the client system to interpret page content, the page must provide a link to a plug-in or applet that complies with 1194.21(a) through (l).</p>	<p>Supported</p>	<p>No additional info.</p>
<p>(n) When electronic forms are designed to be completed on-line, the form shall allow people using Assistive Technology to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues.</p>	<p>Not Supported</p>	<p>No additional info.</p>
<p>(o) A method shall be provided that permits users to skip repetitive navigation links.</p>	<p>Not Supported</p>	<p>No additional info.</p>
<p>(p) When a timed response is required, the user shall be alerted and given sufficient time to indicate more time is required.</p>	<p>Not Applicable</p>	<p>No timed responses are used on the platform.</p>

Section 1194.31 Functional Performance Criteria – Detail

Voluntary Product Accessibility Template

<i>Criteria</i>	Level of Support & Supporting Features	Remarks and explanations
(a) At least one mode of operation and information retrieval that does not require user vision shall be provided, or support for Assistive Technology used by people who are blind or visually impaired shall be provided.	Not supported.	Beyond enlarging content in the web browser using the browsers built in zoom features, no solutions are provided.
(b) At least one mode of operation and information retrieval that does not require visual acuity greater than 20/70 shall be provided in audio and enlarged print output working together or independently, or support for Assistive Technology used by people who are visually impaired shall be provided.	Not supported.	See answer above.

<p>(c) At least one mode of operation and information retrieval that does not require user hearing shall be provided, or support for Assistive Technology used by people who are deaf or hard of hearing shall be provided</p>	<p>Not applicable.</p>	<p>There is no audio content on our platform.</p>
<p>(d) Where audio information is important for the use of a product, at least one mode of operation and information retrieval shall be provided in an enhanced auditory fashion, or support for assistive hearing devices shall be provided.</p>	<p>Not applicable.</p>	<p>There is no audio content on our platform.</p>
<p>(e) At least one mode of operation and information retrieval that does not require user speech shall be provided, or support for Assistive Technology used by people with disabilities shall be provided.</p>	<p>Not applicable.</p>	<p>No part of the platform requires speech input.</p>
<p>(f) At least one mode of operation and information retrieval that does not require fine motor control or simultaneous actions and that is operable with limited reach and strength shall be provided.</p>	<p>Partly supported.</p>	<p>Most of the platform can be accessed through simple mouse and keyboard navigation. Parts of the platform support keyboard navigation.</p>
