The Verify PCard Transactions functionality is used to review, allocate, and process purchasing card (PCard) transactions made on behalf of your department.

The PCard Holder will have the role of Employee as Self within the system, and the approver will have the role of PCard Approver.

The transactions are posted by the vendors to Bank of America, and then they are transferred to Workday. This process typically can take up to two days. Once the transaction has been posted to Workday, the PCard Holder will receive both email and an Inbox item within Workday indicating there is a purchase(s) which needs to be verified and allocated. They will receive an additional message after five days if no action has been taken on the PCard transactions. In addition, the department manager affected by the purchase will receive a notification that the review is still pending.

NOTE: By the end of each billing cycle (the last business day of the month) all PCard Holders and Approvers **MUST** verify any open transactions within Workday.

Process PCard Transactions

- 1) Enter **Verify Procurement Card Transactions** into the *Search* bar and select it from the search results.

The *Verify Procurement Card Transactions* screen displays a listing of the open credit card transactions which need to be verified and updated with the correct worktags for your purchase. The following fields also display:

- a. **Company:** This field defaults to Montclair State University.
- b. **Document Date:** Defaults to today's date, including transactions from today's date or prior.
- c. **Select All:** You have the option of verifying all or a portion of the transactions in the list. Click the Select All box to check all transactions only if they will all be allocated to the same worktags. Otherwise, select the individual transactions to process by clicking in the corresponding - selection box to the left of the appropriate transaction line.

Note: If multiple lines are selected, they will be batched together when sent to the PCard Approver for review and processing.
