

Nutrition & Food Science

Sustainable Food Practices Certificate

ABOUT THIS PROGRAM: Enrollment in this program requires a bachelor's degree and is subject to review of student application. This program does not directly lead to a master's degree, but it can still strengthen your resume and academic performance record. It also provides credits that may eventually be applied to an MS degree (see "**Working Towards an MS in Nutrition & Food Science at MSU**" below).

I. CORE CURRICULUM (complete the two listed courses) **6**

NUFD	576	Food Ethics, Sustainability and Alternatives	3
NUFD	592	Food Systems and Agribusiness Issues	3

II. ELECTIVES (complete any six credits from below) **6**

NUFD	550	Quantity Food Applications	3
NUFD	565	Urban Agriculture and Sustainable Food Systems	3
NUFD	573	Food Regulations and Compliances	3
NUFD	588	Organizational Behavior in Food Businesses	3
NUFD	595	Principles of Food Science	3

TOTAL CREDITS **12**

WORKING TOWARDS AN MS IN NUTRITION & FOOD SCIENCE AT MSU:

For students that wish to eventually apply for admission to the **MS program in Nutrition and Food Science** at MSU, high performance in this certificate program can substantively improve the strength of your eventual application (*although note that this will not at all guarantee your admission to the MS program*).

Furthermore, if you do eventually earn acceptance into the MS program, much (or all, in some cases) of the coursework completed in this certificate program may be applied directly toward your MS degree requirements. If you are interested in this possibility, we recommend you include **NUFD 595** among your selected electives. Contact Adrian Kerrihard <kerriharda@montclair.edu> for more details.
