

National Science Foundation Doctoral Research Assistant Ph.D. in Mathematics Education Full tuition + \$25,000 stipend

College of Science and Mathematics
Department of Mathematical Sciences
csam.montclair.edu/mathedphd

- The **National Science Foundation Doctoral Research Assistantship** supports full-time studies in the Ph.D. program in Mathematics Education at Montclair State University.
- The Assistantship provides **full tuition and a stipend of \$25,000 per year, renewable for up to four years**. NSF Doctoral Research Assistants work with faculty and peers as they gain valuable experiences working on almost every aspect of an NSF-funded project as they work toward a doctoral degree.
- The Assistantships will be awarded on a competitive basis. Applicants will be expected to demonstrate both a strong potential for scholarly work in mathematics education and a passion for mathematics teaching and learning.
- Applications for Spring 2019 admission will be considered through **Nov 15, 2018**. Applications for Fall 2019 admission will be considered through **Feb 15, 2019**.

The Ph.D. Program in Mathematics Education prepares students for careers as:

- Mathematics education faculty at two- and four-year colleges and universities,
- Researchers in mathematics education,
- Curriculum developers,
- Leaders in school districts and educational agencies,
- Research-informed classroom teachers.
