Position Overview
The Clean Energy and Sustainability Analytics Center (CESAC) is a newly established center at Montclair State University, with a focus on assessing clean energy policies, technology, and practices through research and education initiatives. The CESAC is hiring two Student Research Assistants to support our research projects on clean energy and environmental policy analyses. This position is currently offered for Spring and Summer 2019, with a possible extension to 2019-2020 financial year.

The students must be in their Junior or Senior year pursuing a Bachelor’s degree in Economics, Earth and Environmental...
Science, Statistics, and related discipline. Coursework in economics, statistics, environmental science, sustainability science, and data analysis is required.
