A new version of Workday’s user interface has been announced and will roll out on September 8, 2018. Below is a visual aid of some differences between the current interface and the new interface, including a list of homepage changes and terminology updates.

**Homepage Changes:**
1. Home Button is now in the top left corner.
2. Welcome Banner displaying employee’s name.
3. Inbox and Notifications icons broken out of the profile on top right of page.
4. New Announcements section.
5. Worklets are now displayed in the Applications section.
6. New Inbox section, on homepage, displaying most recent inbox items.

**Current User Interface:**
- Currently, the Home and Workday icons are used to return to the homepage.
- Note: The Workday icon at the top center will not be available on the new user interface.

**New User Interface:**
- Currently, the Cloud icon is used to access the Inbox & Notifications.
- Currently, the homepage displays the Worklets only.

**Current User Interface:**
- Currently, the homepage displays the Worklets only.

**New User Interface:**
- Currently, the homepage displays the Worklets only.

**Inbox & Notifications:**
- New Inbox section, on homepage, displaying most recent inbox items.
