Procurement
Requisitions are used to request goods and services for Montclair State University. This guide details the entire purchasing process from creating a requisition through the purchase order process, receiving, and returns. It is important to note the Requester is responsible for managing the lifecycle of each request and following through to ensure all requests are completely closed.

The requesting and managing functionality is available to Administrative Assistants. The approval functionality is available to Cost Center Managers.

Requisitions

The two types of requisitions within Workday are Punch-Out Catalog Requests and Special Requests. Punch-Out Catalog Requests incorporate specific supplier websites with whom we have contracts for specific products. Requesters will be able to navigate to the appropriate website, select the items needed, and assign MSU information to the request in order to place their order.

Special Requests constitute those requisitions for goods and/or services that are not part of the pre-set Punch-Out collection. These will be the majority of most requesters’ requisitions.

Procurement Process

The Procurement process is a set order of steps to ensure appropriate buying procedures have been followed.

Confirm Available Budget

Before a purchase request is entered in the system, the available budget should be confirmed so that the request does not get delayed with any budget review issues.

Confirm Supplier in the System

The Requester should confirm in the system that the supplier information has been set up and is complete.

Enter Requisition

Enter the requisition details into the system and include any attachments as needed.

Approvals

Once the requisition has been submitted, it will be routed the Cost Center Manager, and any specialty Approvers as needed. Any of these approvers can send the request back for changes or approve the request and have it continue through the process.

Procurement Buyer
The Procurement Buyer will then review the request and any related attachments to confirm all information is complete and then approve the request and have a purchase order issued.

**PO Change Request**

Any allowable changes to a purchase order need to be made by the requester and sent through the approval cycle, once budget has been confirmed as available for the modifications.

**Receiving**

When goods are in hand, or services have been delivered, the Requester will need to confirm receipt in the system and attach the related documentation - packing slip for goods, and the completed Certification of Receipt of Services form for services.

**Returns**

Returns can be initiated in the system after the Requester contacts the supplier to receive a Return Merchandise Authorization (RMA) number. When completing the Return information in the system, the original packing slip must also be attached to show proof of receipt.

**Invoice to Accounts Payable**

The Supplier should be sending their invoice to invoices@montclair.edu and it must include the PO number. When sent directly to Accounts Payable at this email address, the turnaround time for payment can be optimized. Should a requester get an invoice, they must ensure that it has the purchase order number on it, and then include the receipt number along with their name and extension before sending it to invoices@montclair.edu

**Payment to Supplier**

Accounts Payable will match the purchase order with the receipt and the invoice, so that a payment can be generated from the system and sent to the supplier.

**Check Budget**

The first step in creating a requisition is to check the available budget for your organization (Cost Center, Gift, or Project) by running the R002 Report. For Grants, run the R134 Report. If the Requester does not have access to these reports, they should speak with their Cost Center Manager to confirm the budget information.
• In the **Search** field, enter R002 to find and run the **Budget Report**.

• In the **Search** field, enter R134 to find and run the **Grant Summary by Ledger Account** report.

1) In the **Organization** field of the R002, select the **Prompt** icon and search for the organization you wish to view. To view a list of all Cost Centers or Gifts to which you have access, select **Active Cost Centers** or **All Gifts**.

2) In the **Organization** field of the R134, select the **Prompt** icon and search for the project you wish to view.

3) Click the **OK** button.

*The R002 Budget Variance Report.*

Review the appropriate Parent level Available Budget column to ensure there is money available for the proposed purchase.

If there is not enough budget in the correct parent account, a budget amendment will need to be completed and approved. Please go to the Workday 2020 website to access the Budget Amendment Reference Guide.

*The R134 Grant Summary by Ledger Account report.*
Once confirmed that there is enough budget to proceed, begin to build the request.

**Confirm Supplier in Workday**

**BEFORE** beginning the Requisition process, confirm the supplier exists in Workday.

1) **Type** **Find Suppliers** in the *Search* field in the upper left corner of the screen, and click **Find Suppliers – Report**.

2) On the *Find Suppliers* screen, enter the name of the supplier on the *Supplier* field.
3) Click **Enter** to process the search.
4) From the list of search results, click the **selection box** next to the appropriate supplier for the request.

5) Click the **OK** button.
In the supplier report:

- A status of “Active”, in the Supplier Status column, indicates the supplier is available to use. Other statuses include “Inactive” (supplier has not been used in a specific period of time), “Hold” (temporarily unavailable if there is an issue with this supplier file), and “Draft” (the file is being created or updated).
- The Supplier Contacts column lists the name(s) of the connection(s) within the supplier that works with Montclair State University.
- The Primary Remit-To Address shows the default location of where payments are sent for this supplier.
- The Remit-To Connections displays the alternate addresses on file for where payments can be sent.
- The Order-From Connections lists the associated addresses for where the purchase orders should be sent for this supplier. When checking the status of the supplier, make note of the preferred address of where your specific purchase order should be sent, as you will need to indicate this on the corresponding requisition.
- The Affirmative Action, Business Registration Certificate, and Chapter 51 columns indicate which documents are on hand, the ID numbers, issue and expiration dates for the specific supplier.

If the supplier does not exist in the system or the supplier's contact information is incomplete or needs updating, please have the supplier complete the Supplier Create/Maintain Form. Once you have received the completed form from the supplier, along with their W9 or W8, fill out the header section of the form with your information so that you will be notified once it is done. The form and W9 or W8 must be sent to suppliercreate@montclair.edu.

The Supplier Create/Maintain form can be found on the Procurement Services website under Forms.

A supplier can be used in a transaction, ONLY if their status is “Active”, AND there is data in both the “Primary Remit-To Address” and “Order-From Connections” fields.
To the right of the Supplier, is where you would locate the State required certificates and their expiration dates.

Dollar Threshold: $17,500 and above Requirements: Chapter 51 (Political Contributions Disclosure Form) Policy & Regulations: State of NJ Requirement

Dollar Threshold: $34,400 and above Requirements: Affirmative Action Certificate.

Enter a Requisition

1) Enter Create Requisition into the Search bar and click Create Requisition – Task.
Alternately, click the **Cost Center Finance & Budget** icon in the *Application window* on the Home page and select **Create Requisition** from the **Tasks** pane on the **Requisitioning** tab.

The Create Requisition screen displays and defaults data in the following fields:

- Company
- Requester
- Currency
- Deliver-To
- Ship-To
- Cost Center
- Division
- Additional Worktags – Fund, Location, Program

2) Click the **prompt** icon to select the **Requisition Type** (previously called the Purchasing Methodology) and is a required field. Requesters must choose from the following:

- 2 Quotes (Delegated Purchasing)
- 3 Quotes (Delegated Purchasing)
- BOT Waiver of Advertising
- Choice Partners Co-Op
- Educ Svc Comm Coop of NJ
- Emergency Procurements
- GSA Contracts
- Hunterdon County Edu Svc Co-Op
- NASPO Cooperative Co-Op
- National IPA Co-Op
- Natl Joint Power Alliance Co-Op
- New Jersey State Contracts
- Other
- PACE Co-Op
- PEPPM Co-Op
- Purchasing Assoc Coop Ent Co-Op
- Renewals
- Sourcewell Co-Op
If the Requisition Type contains an identifying number (contract ID number, BOT Waiver number, etc.), the system will prompt you for the number AFTER you click the Submit button at the end of the requisition. Once the questionnaire is launched, complete the field with the corresponding number and submit the questionnaire to the system.

For definitions of the Requisition Types, or further information on the different Co-Ops, please check the Procurement website.

3) If this requisition is for a cost center than the one defaulted, or for a gift, grant, or project, change the worktags on this screen by clicking the *X* in the corresponding field to remove the default fields and search for the appropriate worktag via the prompt icon. The updated worktags will then be updated on each line of the requisition.

**Note** - If a requisition is created for another Cost Center, Grant, Gift, or Project that the requester does NOT have access to view, the system will display the following soft warning:

```
Alert
1. Page Alert
- You have used a cost center(s) that you are not listed as a requisitioner for. This will prevent you from being able to run financial reports and see payment detail. If you need this access, please request access to the following Cost Center(s):
  Impacted Cost Centers: CC10249 VP Facilities  [Requisition]
```

This soft warning will not prevent the request from being submitted in the system.

4) Click the **OK** button.
5) On the Create Requisition screen, under the Select an Option section, select the type of request to create:

a. **Non-Catalog Items** – represents Special Request purchases for goods and services including anything that is not within a Punch-Out catalog.

b. **Connect to Supplier Website** – opens the list of Punch-Out catalogs from which to create requests.
6) Click the **Request Non-Catalog Items** link to begin a Special Request requisition and display the Request Non-Catalog Items request screen.

Click the **Connect to Supplier Website** to select from a list of Punch-Out Catalogs. See the Create a Punch-Out Requisition section of this guide for more details.

**No Charge Goods Line**

Zero value line items should be added into requisitions to better track and receive free, sample, and replacement items.

Line item 2, below, is an example of a zero line item added to a requisition from a quote.
Discounts and Credit Memos

Please note the following parameters when dealing with discounts and credit memos in requisitions:

- Discounts to be taken as a separate line item entered as a negative number.
- If applying a discount on the quote (Negative Number), that credit must be added in the Goods area as a line item within a requisition, as shown below.
- If a quote has been received from the supplier with the discounts already applied, use the quote pricing as is because the discount has already been deducted from list price.

- Any credits memos should be sent to Accounts Payable directly, and NOT attached to a requisition.
Non-Catalog Items – REQUEST GOODS

Complete the required fields as listed below:

**NOTE:** If the supporting quote has fifteen or less line items, the requisition must have all lines. If more than fifteen lines on the supporting document, one line is acceptable.

a) **Non-Catalog Request Type**: Indicate if this is a request for goods or services. **Note**: Select *Goods* when requesting physical objects or Consulting Services. Consulting and Professional Services are entered in the system as Goods to capture the breakdown of hours and hourly rate from the person doing the job. Any items requested will need to be received in Workday by the requester once delivered.

b) **Item Description**: As this information will print on the purchase order for the supplier, enter all details for the item, including the quote number, manufacturer or part number, and specific description on the item/service being requested.

c) **Spend Category**: Represents the commodity being requested (previously called the Account/Category Code). Click in the field and enter the number, name of the category, or use the dropdown list provided to locate and select the appropriate spend category.

   **Note** – Select the spend category based on what is being purchased, not based on the related child account in the budget.

   **Note**- Once the spend category has been selected, click the related actions twinkie to confirm the parent pool name for the spend category.

d) **Supplier** – Leave this field blank as it should be completed at the end of this process, unless instructed to complete by the Procurement Department.

e) **Supplier Contract** – Leave this field blank unless instructed to complete by the Procurement Department.

f) **Quantity** – Enter the number of items for goods, or hours for services, being ordered. **Note** – Workday does not support fractions within the quantity field.

g) **Unit Cost** – Enter the cost of one unit of the line item.

h) **Unit of Measure** – Select the appropriate unit of measure from the dropdown list.

i) **Extended Amount** – This field auto-calculates based on the quantity and cost fields.

j) **Memo** – Enter information in this field for the approver and buyers. This is an internal memo line and does not print on the purchase order.
Non-Catalog Items – REQUEST SERVICES

Complete the required fields as listed below:

a) **Non-Catalog Request Type**: Indicate *Services* for task oriented orders based on dollar amounts rather than quantity. These items will need to be received in Workday based on dollars due rather than quantity.

   **Note**: Select *Goods* when requesting Consulting Services.

b) **Item Description**: As this information will print on the purchase order for the supplier, enter all details for the service being requested.

c) **Spend Category**: Represents the type of service being requested (previously called the Account/Category Code). Click in the field and enter the number, name of the category, or use the dropdown list provided to select the appropriate category.
**Note** – Select the spend category based on what is being purchased, not based on the related child account in the budget.

**Note** - Once the spend category has been selected, click the related actions *twinkie* to confirm the parent pool name for the spend category.

d) **Supplier** – Leave this field blank as it should be completed at the end of this process, unless instructed to complete by the Procurement Department.

e) **Supplier Contract** – Leave this field blank unless instructed to complete by the Procurement Department.

f) **Start Date/End Date** – If the service begins and ends on specific dates, enter them here. This information will print on the purchase order, and is used only as reference within the system.

g) **Extended Amount** – Enter the total cost of the service here.

h) **Memo** – Enter information in this field for the approver and buyers. This is an internal memo line and does not print on the purchase order.
6) Click the **Add to Cart** button in the lower left corner of the screen to include the line information in the request.

The *Add to Cart* confirmation pop-up message displays on the top banner of the screen.

![Add to Cart button](image)

7) Fill in the blank form with the next line item of your order, and click the **Add to Cart** button until all lines have been added to the requisition.

8) Click the **shopping cart icon** in the upper right corner of the screen to review line items in the cart.

![Shopping cart icon](image)

The *Cart* pop-up window displays the goods and/or services that have been added to the cart, on the upper right corner of the screen.

9) To review the details of the line items within the cart, click the **View Cart** button, within the pop up window. If you do not need to adjust any of the line items, click the **Checkout** button in the lower left corner of the pop up window.

![View Cart and Checkout buttons](image)

10) Review each item's information in the cart and click the **Checkout** button to proceed with the request when done. **Note** - The only fields which can be edited on this screen are: Description, Quantity, and Memo. Should any line need to be deleted, click the trash can on the corresponding line.
11) If additional items need to be added to the cart, click the Continue Shopping button then select the Request Non-Catalog Items option.
12) Click the Checkout button to continue.

Create a Punch-Out Requisition

1) On the Create Requisition screen, under the Select an Option section, select Connect to Supplier Website to open the list of Punch-Out catalogs available.
2) Click the Connect button on the far right of the appropriate catalog name to be brought to the associated website.

The selected website displays.

3) In the Search field, enter a keyword to locate the item(s) you are purchasing, and click the magnifying glass to run the search.

4) When the results display, indicate the quantity of the item, and click the Add to Cart button to confirm the item for purchase. Note – Workday does not support fractions within the quantity field.
The system confirms the item has been added to your cart and provides options to Continue to Checkout or Continue Shopping.

5) Select Continue Shopping to add more items to your request. Otherwise, click the Continue to Checkout button.

The Workday View Cart screen displays and lists the items selected for the request. Note: As this is a punch-out request, no changes can be made.
6) Click the **Checkout** button.

**Note** - Punch-out requests, once submitted, cannot be edited or canceled. Requesters will need to receive all goods and return them if an inaccurate quantity or item was ordered from the supplier. Please see the [Returns](#) section in this document for details on this process.

### Checkout Process for a Requisition

Once the Checkout button has been selected, the system displays the Checkout screen.

**Note** – When the Checkout screen displays, an Error bar will appear. This is to indicate that the Supplier field must be completed. DO NOT complete the supplier field at the beginning of the form as it will then need to be manually added into each following line. Instead, the supplier should be selected at the end of the request on the **Edit Requisition Defaults** screen, in order to be automatically completed on each line.

The requisition is broken down into five separate sections. Review the information within each section and complete those which are required to process the request.

1) The **Shipping Address** information defaults in based on the user, and cannot be changed. **Note**: The information in the **Ship-To Address** field prints on the purchase order for delivery.

2) Scroll down to the **Requisition Information** section.
3) In the *Requisition Information* section, review and complete the following fields:
   a) The *Request Date* field defaults in as the current date.
   b) The *Currency* field populates as USD (U.S. Dollars).
   c) Leave the *High Priority* check box blank as it is not being used by MSU.
   d) Leave the *Sourcing Buyer* field blank.
   e) The *Requisition Type* field populates based on the previous selection.
   f) Leave the *Sourcing Buyer* blank as the system will populate after approval.
   g) The *Freight Amount* should be completed in the header of the requisition, if it is provided by the supplier, otherwise it should be left blank. Please do not add freight as an additional line item. **Note** – The freight amount is distributed equally among spend categories on the request, and is charged when goods are delivered to MSU.
   h) The *Other Charges* field should be completed in the header of the requisition for any specific additional charges, such as shipping and handling or hazardous materials surcharge. If there are no other charges, then leave this field blank. Please do not add freight as an additional line item.
   i) In the *Memo to Suppliers* field, enter “*Attn: your full name, building code, room number*” on the first line of the field. Enter any other comments to the supplier below your “Attn to” details.
   j) Enter any additional comments regarding the order for the approver or buyer in the *Internal Memo* field. For example; Grant ID#, Project #, Gift #, etc.
4) Scroll down to the Goods section.

5) In the Goods or Services sections of the requisition, use the scroll bar to review each field within the specific line and verify the following fields are complete and correct:
   - **Spend Category** – confirm this is the appropriate code for the line item.
   - **Supplier** – DO NOT complete the Supplier field on the line item. Use the **Edit Requisition Defaults** function at the very end of the request process.

6) Scroll to the far right on the line details to review the Worktag fields.
   - **Cost Center** – The department number of the requester. Can be a driver field used as the basis to populate Additional Worktags.
   - **Division** – Represents the section within the University for the Cost Center and defaults based on the driver worktag selected.
   - **Additional Worktags** – A collection of other identifying data. Requester can complete their Project, Gift, or Grant to populate other fields (such as Cost Center and Division) on the line.

**Note:** When any driver worktags are selected, the Fund, Division, Program, and Cost Center will auto populate. These defaulted values should not be changed.

**For **Facilities orders, please select and complete the **Location** option from the Additional Worktags field to indicate to which building the purchase is assigned.
7) Scroll down to the Attachments section.

Attach back up documentation on all requests, which can include quotes, proposals, rate sheets, contracts, sole source justifications, etc. **Note** - Each attachment should be added as a separate file into the system.

8) In the Attachments section, click Select files to attach any required/relevant documents - such as quotes, logo files, etc., to this request.

9) Select the External checkbox to have the specific attachment sent to the supplier with the purchase order.

10) At the bottom of the screen, click the grey button with the ellipse on it, and select **Edit Requisition Details**, to open the option to set the Requisition Defaults.

The **Edit Requisitions Defaults** page displays.
The information entered in the *Edit Requisition Defaults* screen is where the supplier and corresponding order-from connection for the request, and any line splits for the entire request, should be entered.

11) In the **Supplier** field, click the **prompt** icon to add the specific supplier for this request. **Note**: only one supplier can be listed on a requisition.

12) In the **Order from Connection** field, click the prompt icon and select the appropriate address for the purchase order. It is **required** to select a Supplier and an Order From Connection.

13) If worktags other than those which default in with the Requisitioner need to be assigned to this request, select the **Use Default Worktags** option under the *Default Worktags and Splits* section to assign the new worktags all lines within the request. Worktags, along with cost breakdown, can be set at this field for the requisition.

14) If line items need to be split among different entities (cost centers, grants, gifts, and/or projects), select the **Use Default Splits** option under the *Default Worktags and Splits* section and assign the breakdown of the splits for each entity to be assigned to each line item within the requisition. If only one or some of the line items need to be split, that should be done on the specific line item(s) within the requisition and not on this screen.

15) Click the **Apply** button to apply this information and return to the requisition.

### Split the Cost of a Line Item

1) To split the cost of a line, scroll to the far right of the line and click the zero in the **Splits** column.

2) On the pop-up, click the drop-down to select if the split will be based on dollar amount or quantity.
3) On the displayed line, enter the percent or amount of the first portion of the split.
4) Enter the appropriate driver worktag in either the **Cost Center** field or the **Additional Worktags** field.
5) Click the **plus sign** immediately under the Item counter, and complete the split information on the inserted line.
6) Continue to add lines until 100% of the total line amount has been allocated.
7) Click **Done** to return to the requisition.
8) Click the **Submit** button to submit the request to the approver.
9) If the **Complete Questionnaire** button displays, click the button and complete the questionnaire to list the corresponding number for the specific purchase (i.e., contract number, board of trustees’ waiver number, Co-Op number, etc.). At the end of the questionnaire (if required), click the **Submit** button to submit the request to the approver.

### Review Budget Check

If the system finds an issue with the budget versus your request, a “Review Budget Check” action and Review button displays on the screen, once the request is submitted. An item will also be sent to your Inbox, Actions tab. **NOTE-This request will NOT be sent to the approver for review if there is an issue with the budget.**
1) Click the **Review** button to drill into the request in order to find the issue.

In the upper right corner, the budget status displays.

2) Click the **View** button on the line to see the specific details of the request.

3) Review the columns of the report, and pay special attention to the Budget Amount versus the Current Transaction columns.
4) Based on the information provided, decide if a Budget amendment needs to be completed, or if the request should be edited to adjust the Worktags.

**Name a Non-Catalog Requisition**

In order to easily identify specific requisitions when in the receiving process, each requisition should be given a unique, easily recognizable name. Once the requisition has been submitted for approval, the Requester must add a name onto the Additional Data of a request.

1) From the *My Requisitions* report, click the related actions button of the appropriate requisition.

2) In the Actions pop up menu, select Additional Data and View All.

3) On the View All Additional Data screen, click the Edit button to add the requisition name for this request.
4) On the *Edit Additional Data* screen, type the unique name in the *Requisition Name* field and click *OK*.

5) When the system confirms the name of the request, click the *Done* button.
The name of the requisition will be included on the Lifecycle Report, under the Requisition Name column, to help identify the appropriate request when receiving goods and services.

**Edit a Non-Catalog Requests**

Once a request has been submitted and before the Approver has processed the request, the Requester can edit a non-catalog requisition.

1) From the *My Requisitions* report, click the related actions button of the appropriate requisition.

2) In the *Actions* pop up menu, select Requisition and Edit.

3) On the *Edit Requisitions* screen, navigate to the field(s) to change and make your edits.

4) When all changes are made, click the Submit button to send the revised request back through the approval flow.
Cancel a Non-Catalog Requests

Once a request has been submitted and before the Approver has processed the request, the Requester can cancel a non-catalog requisition.

1) From the *My Requisitions* report, click the **related actions button** of the appropriate requisition.

2) In the *Actions* pop up menu, select **Requisition** and **Cancel**.
3) On the Confirm Requisition Cancel screen, review all information to ensure the correct requisition has been selected, and click the OK button to cancel the request and stop the approval flow.
The status of the request will be listed as Canceled on the View Requisition screen.
System Drafts - Requisitions

If a requester is in the process of entering a requisition and does not select Checkout or Save for Later in Workday, the system will retain the in progress requisition with no number associated to it. Additionally, there is no encumbrance held against this type of system draft. The requester should go into the system, and periodically clean any of these requests so as to reduce the number of unnecessary requests in the system.

1) To locate these requests, type **Find Requisitions** in the **Search** bar, and select the same task from the results list.
2) Locate the line(s) within the displayed list that has no assigned requisition number(s).
3) Click the **twinkie** next to the magnifying glass to the far left of the targeted line.
4) In the **Actions** column of the pop up window, hover over the **Requisition** option and click **Add More**.

![Diagram](image)

5) When the **Cart** screen opens, click the **Checkout** button in the lower left corner of the screen.
Note – Any errors in the request must be resolved before the request can move forward and be canceled.

6) On the *Checkout* screen, click the *Save for Later* button in the lower left corner.

![Cart with Save for Later highlighted](image)

The requisition will now have a number associated to it.

7) Click the *Actions* button on the banner, next to the requisition number, then hover over the *Requisition* link and click on the *Cancel* option.
8) When the page refreshes, click the *OK* button in the lower left corner of the screen to confirm to cancel this request.

**Save for Later**

1) When the *Save for Later* button is selected, your request has been saved in the system and can be returned to later.
2) Type **My Requisitions** in the *Search* bar in the upper left corner of the screen and select the same option from the search results to view a list of your requisitions.

![Image of My Requisitions screen]

The *My Requisitions* screen displays.

3) Click the **OK** button in the bottom left corner to display a list of all related requisitions.
The report displays the list of your requisitions listing the requisition number, type, date, amount, supplier, corresponding purchase order number (if any), status, memo to supplier, and internal memo.

To review the specific requisition details, click the requisition number in the list.

**Approval Process**

Once submitted, the request moves forward for reviews and approvals. The specific approver will receive a notification in their Workday Inbox.

**Note**: all chemical requisitions (hazardous or non-hazardous) will route to a Specialty Manager in Environmental Health and Safety for approval.

1) To access the item for review, click the **Inbox** icon in the top right corner of the Workday homepage.

2) Click the **Actions** tab, and click on the corresponding item to display the requisition.
3) Expand and verify the following areas within the requisition before selecting to approve or send back a request.

**Shipping** – The ‘deliver to’ information.

**Information** – Header information of the request.

**Goods/Services** – Select the corresponding expansion arrow at the section to review and display the line item details. Review all details and verify the appropriate goods/services have been listed with anticipated related costs and quantities. At the far right of each line, the selected worktags display as well as any cost splitting information.

**Attachment** – If active, click the arrow next to Attachments to identify what has been associated to the request. Click the corresponding file name to open and review the file.

**Questionnaire** – If active, review and confirm the answer provided.

4) When all information has been reviewed and confirmed, click the **Approve** button at the bottom of the screen to approve the requisition and send it to the next approver in the workflow.

   If there are changes needed, click the **Send Back** button and enter comments as to what needs to be changed. The Requester will receive a notification of the status, view the comments and edit the request.

   Additional processing options are located behind the ellipse button. **Deny** terminates the request in the system. The **Cancel** option will close the screen being viewed and retain the item in the Inbox until an action is selected by the approver on the request.

**Note:** any comments and actions relating to this request will be captured and displayed at the bottom of the request in the *Process History* section of the screen.
The process moves forward for additional reviews and approvals to the list below.

**Note**: any of the approvers can Approve, Send Back the request to the Initiator with a comment on any changes to be made, or Deny which terminates the request.

- Cost Center Manager or Grant Manager (PI)
- Special Approver (if required) – Grants Accounting, Project Manager, Gift Manager, Spend Category Approver
- Buyer
- Additional Procurement Approver (if required)

When all approvals have been completed, the requisition is processed and a purchase order is created and issued to the selected supplier.

The Requester receives a notification and an email when a requisition becomes an issued purchase order.
Check the Status of a Requisition

1) Navigate to your Inbox and click on Archive to view your submitted requests in the system.

2) Click on the appropriate notification to view the details of the requisition.

3) In the View Event section of the screen, the Details tab displays the details of the requisition, and the Process tab shows the process history of the request.

To view all of your requisitions:

4) Type My Requisitions in the Search bar in the upper left corner of the screen and select the same option from the search results.

The My Requisitions screen displays.

5) The system is set up to display all of your requisitions. To filter your results to see specific requisitions, enter data in the displayed fields of the My Requisitions screen. With the Exclude Canceled and/or Exclude Closed boxes selected, the result will display requisitions meeting those classifications.
6) Click the **OK** button in the bottom left corner to display a list of all related requisitions.
The report displays the list of your requisitions listing the requisition number, type, date, amount, supplier, corresponding purchase order number (if any), status, memo to supplier, and internal memo.

To review the specific requisition details, click the requisition number in the list.

**Purchase Orders**

When a requisition has been completely approved and issued as a purchase order, the Requester will receive a notification and an email. If the requester needs a copy of the issued PO, please contact the buyer.

Requesters can identify statuses on purchase orders and purchase order lines. PO headers display statuses to help requesters quickly identify purchase orders that are:

- Fully invoiced or paid.
- Fully shipped or received.
- Partially invoiced or paid.
- Partially shipped or received.

Purchase Order lines display the detail status of receipt for each line.
If changes need to be made to the request, the Requester will need to create a Change Order. Changes to purchase orders can only be:

- Made up to the point of a purchase order being completely received.
- Completed on the price, description, and quantity/amount fields.
- New lines on the original request. (Entire line must be completed)

Any changes to a purchase order will re-initiate the approval flow. The complete change process is as follows:

- Purchase Order is issued.
- Requester initiates a Change Order, after verifying appropriate funding is available.
- Approver(s)/buyer processes change request.
- Requester gets approval notification and must again confirm funding is available for the change.
- Requester approves the Change Order.
- Changes are sent to Supplier via purchase order version.

**Create a Change Order**

1) Enter **Create Change Order** into the *Search* bar and click **Create Change Order – Task**.

2) On the *Create Change Order* screen, enter the number of the purchase order that needs to be changed, and click the **OK** button.
3) On the header section of the Create Change Order screen, the Memo field MUST be completed with the details of what fields are changing. This information will be sent to the Supplier on the purchase order version.

4) Scroll down and leave the “Apply Header Changes to all lines on Save or Submit” checkbox as blank.

5) Select either the Goods or Services tab per your change.

6) On the corresponding line to be changed, scroll to the appropriate field, and enter your changes. Change additional lines as needed.
7) When all changes are completed, click the **Submit** button to re-initiate the approval process.

Note: If this change caused the total to be $6,880 or greater, an attachment is now required as the Requisition Type is now 3 Quotes.

The Requester receives a notification in their Inbox when all approvers have processed this change.

8) The Requester will need to confirm the funds needed for the change are available, from the R002 or the R134 (for Grants).

9) Once funding is confirmed, the Requester can click the **Approve** button to indicate the purchase order version can be issued. **Note:** Once this step is complete, the Change Order cannot be adjusted until the purchase order version has been issued.
Check the Status of a Change Order

Note: Once entered into the system, Change Orders cannot be edited. Should any adjustments need to be made, another Change Order will need to be created and processed.

1) Enter the purchase order number into the Search field and click Enter.

2) On the Search Results screen, scroll down and select All of Workday at the bottom of the list on the left to locate the purchase order in the system.

3) Click the purchase order number to open it.

4) To view where in the approval process the change is sitting, scroll down and select the Version History tab and click the magnifying glass on the appropriate line of the Pending Changes section.
5) Next, when the View Purchase Order screen opens, scroll down and click the Process History tab to see who is next in the business process.

Create Receipt

Once the purchase order has been fulfilled by the supplier, the Requester will need to enter the receipt information into the system.

1) Enter Create Receipt into the Search bar and click Create Receipt – Task.

2) On the Create Receipt screen, enter the purchase order in the Purchase Order field, if known. Otherwise, click the prompt icon to filter on the supplier.

Alternately, go to the My Requisitions report, click the twinkie of the corresponding PO number to hover over the Receipt option, in the Related Actions area, and click
Create in order to enter the PO number into the initial Create Receipt screen. If Create receipt is not an option, please check the PO detail business document lines for any draft receipt before continuing.

Note: The system will not allow multiple drafts. Only one receipt draft per PO is allowed.

3) **ONLY** if all items or hours have been received for the PO, click the Fully Receive checkbox.

4) Click the OK button.

The Create Receipt screen displays.
5) Scroll down and click on the Lines tab to enter the actual receipt for goods or services.

When receiving goods, click in the Quantity to Receive field on the corresponding item line and enter the actual amount of items received.

When receiving services, click in the Amount to Receive field on the corresponding service line and enter the actual amount of units received.

**Note** – When receiving within a multi-line purchase order, all lines must have a quantity entered. For those lines that do not have a current receipt associated to them, confirm a “0” is in the Quantity to Receive or Amount to Receive field.

You will not be able to over-receive good items, a change order must be created in order to adjust the amount for receiving.

6) Scroll up and click the Attachments tab to add your receiving document to the header of the request.

7) Click the Edit button on the Attachments screen.
8) Click the Select files button to add supporting documentation to the receipt and click Save. Note: Attachments are required for ALL receipts.

9) Scroll up and click the Information tab to change any information, such as the receipt date, add the tracking number and/or comments in the memo box.  

10) Click the Edit button on the Information screen.
11) Add and update the information, such as the receipt date, the tracking number and/or comments in the memo box as needed, and click Save.

12) Click the Submit button to process the receipt.

The system displays the confirmation banner that the receipt was successfully submitted.
View Receipts

1) To view all of your receipts within the system, type **My Receipts** in the **Search** field and select the corresponding search result.

2) When the **My Receipts** page displays, click the **OK** button in the bottom left corner to display all receipts related to your sign on. Otherwise, enter criteria in the appropriate fields to filter your search results.

A list of your related receipts displays.
3) Click on any column header to access and select a sort filter for the data.

4) To view the details of a specific receipt, click on the appropriate receipt name in the Receipt field.

5) Click the Goods Lines or Service Lines tab to view the receipt information.

Cancel Receipts

1) To cancel a receipt, click the magnifying glass in the upper left corner of the View Receipt screen to display the related actions.

2) In the Related Actions window, click the Receipt option and select Cancel to remove the receipt from this purchase order.
Returns

When goods need to be returned to the supplier, either from over ordering or damage, the Return process needs to be completed in the system. Only items which have been received in the system can be returned.

1) Enter **Create Return** into the **Search** bar and click **Create Return – Task**.

![Create Return - Task]

2) On the **Create Return** screen, enter the number of the purchase order from which the goods were ordered.

   Alternately, go to the **My Requisitions** report, click on the twinkie of the corresponding PO number to hover over the **Return** option and click **Create** in order to enter the purchase order number into the initial **Create Return** screen.

3) Click the **OK** button to continue.
The *Create Return* screen displays.

4) The Requester must complete the **Return Reason** by clicking the prompt icon and selecting the appropriate reason for the return.

5) In the **Supplier RMA** field, enter the code received from the supplier when they were notified that returns were on the way.

6) Scroll down to the **Goods** tab and on the appropriate line, enter the quantity of the item to be returned in the **To Return** column.
7) Attachments are required for each return, and should be a copy of the corresponding packing slip or any written confirmation from the supplier regarding the return.

8) Click the Submit button to confirm the return within the system.

**Requisition Lifecycle Report**

The Requisition Lifecycle Report displays all requisitions for a Cost Center, Grant, Gift, or Project, along with the related purchase orders, receipts, returns, and any payments and invoices. The report is organized by transaction type, and can be filtered on any of the requisition columns.

1) Enter Lifecycle into the search field and select Requisition Lifecycle.

   Alternately, go to the Requisition Dashboard by selecting the Cost Center Finance application, and click the Requisition Lifecycle option in the Reports window.

2) Click OK to see the full list of all of the requisitions for which you have been granted access. This includes all transactions for the cost centers you have access to, as well as any grant purchases entered into the system.
The Requisition Lifecycle displays the following columns:

Requisition section
- **Requisition** – provides access to the related actions for the requisition, including view accounting, view/edit additional data, and create requisition.
- **Requisition Name** – displays the name the requester assigned to the request.
- **Requested By** – identifies the requester.
- **Requisition Amount** – shows the total amount of the request.
- **Freight Amount (Included in Requisition Amount)** – displays the freight cost for the request.
- **Other Charges (Included in Requisition Amount)** – displays any other charges related to the request.
- **Requisition Status** – displays the current status of the request.
- **Requisition Awaiting Persons** – lists any people that still need to perform an action on the request in order to move to the next step of the business process.

Purchase Order section
- **Purchase Order** - provides access to the related actions for the requisition, including close PO, view accounting, and create return.
- **PO Number and Version** – displays the purchase order number with the current version number after the dash.
- **Purchase Order Status** – displays the current status of the PO.
- **Supplier** – indicates the purchase order vendor and if it is a punch out order.
- **Issue Option** – displays how the PO was sent to the supplier.
- **Issued Date** – the date the purchase order was sent to the supplier.
• **Total Quantity Ordered** – shows the overall order quantity for the entire purchase order. For Service line items, the quantity will display as “0”.

• **Total Quantity Received** – shows the overall received quantity for the entire purchase order. For Service line items, the quantity will display as “0”.

• **Total Returned Received** – shows the overall returned quantity for the entire purchase order. For Service line items, the quantity will display as “0”.

• **Quantity Invoiced** – displays the total dollar amount of the invoices for the order.

• **Amount Ordered** – shows the total dollar amount of the order.

• **Amount Received** – shows the total dollar amount of goods/services received against the order.

• **Amount Invoiced** – total amount in dollars, that has been submitted via invoice(s) by the supplier, for the specific purchase order.

**Supplier Invoice section**

• **Supplier Invoice Document** – the original invoice(s) submitted by the supplier.

• **Invoice Number** – invoice number(s) submitted by the supplier.

• **Invoice Amount** – total amount of invoices, in dollars, submitted by the supplier.

• **Invoice Status** – current status of the invoice(s) submitted by the supplier.

• **Document Payment Status** – current pay status of invoice(s) submitted by the supplier.

**Supplier Invoice Payments section**

• **Payment Date** – the date the payment(s) was sent to the supplier.

• **Payment Amount** – the amount sent to the supplier.

• **Payment Type** – the mode of payment to the supplier – check or ACH.

• **Transaction Reference** – the reference number associated to the payment type.

**NOTES**

✓ In order to better manage this data, each column can be filtered or sorted by clicking into the column header and selecting the appropriate action from the menu.

✓ Click on a blue requisition number to view the details of the requisition data.

✓ Click on the twinkie (related actions) next to a requisition number to see the summary information of the request.

**Requisition Dashboard**

**Dashboards** are pre-configured pages related to functional areas within Workday. They are populated with related charts and data. Some may also include related tasks, menus, and announcements. In Workday, data can be entered using “tasks” and viewed using “reports.” The Workday Home page displays Applications that provide access to tasks and reports.

An easy way to see all of your requisitions and related transactions is to utilize your Cost Center Finance Dashboard. On your Home screen, click the Cost Center Finance application icon to launch the related dashboard for your cost center.
There are various windows on the Requisitioning tab within the dashboard, each reflecting related data for the requisitioner. Some examples of the information available are: Requisition Summary by Spend Category, Requisition Summary by Supplier, Requisition Progress Monitoring, and Supplier Invoices in Exception. Additionally, there are Tasks, Reports, and Links sections that reflect the most frequently used items for requisitioners.

To see more detailed data on any of the windows, click onto a data point, blue text, or the corresponding View More… bar in any window.
