HUMC is the largest water consumer in the region at 112 MILLION GALLONS

INITIATIVES

NATIVE/DROUGHT TOLERANT PLANTS
By using native and drought-tolerant plants since 2014, that has saved us 119,000 gallons of water.

HYDRATION STATIONS
Installing hydration machines throughout our campus ensures that our team members stay hydrated.

WATER-EFFICIENT EQUIPMENT
Replacing our sterilization machines with water-efficient models has lowered our water consumption by 18%

These initiatives have led to a 23% reduction in water usage since 2012.
